Rohit Jain

Rajgarh, Raj.
INDIA

Results-driven **Senior Full Stack Developer** with **6+ years** of experience building enterprise-scale web and cloud-native applications. Skilled in **Python, Svelte (SvelteKit), React (NextJS), Node.js, AWS,** and API-driven architectures, with expertise in scalable **UI** frameworks, **CI/CD,** and **AI/LLM-driven** solutions. Proven record delivering high impact systems across Tech, pharma, and biotech sectors.

Work Experience:

Deel
Jan 2026 - Present

Full Stack Engineer

- Working on GTM products to optimize SDR and AE efficiency, drive growth in MQLs, and increase SQO conversions.
- Collaborated with Product Owners and Data Stewards to translate business requirements into scalable technical solutions.

Ascendion (formally Collabera Digital)
Oct 2024 – Dec 2025

Senior Software Engineer

- Designed and developed scalable backend systems for real-time applications, improving system performance and reliability.
- Architected API-driven backends for high-performance MDM workflows and enterprise-grade solutions.
- Mentored and managed cross-functional teams, overseeing task allocation, sprint delivery, and code reviews.

MSC Gmbh (Munich, Germany)
Sep 2023 – Oct 2024

Senior Full Stack Developer

- Developed a restaurant POS Backend for (3 web + 4 mobile apps) with real-time data sync via Kafka and WebSockets.
- Designed and integrated microservices within distributed architecture, ensuring seamless communication and performance optimization.
- Built scalable portfolio management systems aggregating multiple 3rd-party data sources concurrently.

TechMET Solutions
Jun 2021 - Aug 2023

Lead Developer & Project Manager

- Oversaw a portfolio of 5 key projects, ensuring smooth resource allocation and consistent, high-quality deliveries
- Developed a scalable portfolio management system & algorithms to get data from multiple 3rd Parties simultaneously
- Engineered a user-interest-based matchmaking algorithm, driving a significant increase in user engagement & personalization.

King Technologies
Feb 2020 - Jun 2021

Software Developer & Tutor

- Tutored overseas students in React and NodeJS helping them grasp key concepts and develop practical skills.
- Assisted learners on Chegg & Course Hero, enhancing their problem-solving abilities and academic performance.

Skills:

- Languages: **TypeScript, JavaScript, Python, Rust**
- Frameworks & Libraries: **Svelte (SvelteKit), React (NextJS), NestJS, Node.js, Express, Fastify, Design Systems, Tailwind, Flutter (Dart)**
- Backend & DBs: **PostgreSQL, MySQL, Redis**
- Cloud & Infra: **AWS, Nginx, Docker, VPS, CI/CD (GitHub Actions, GitLab, Jenkins), Kafka, WebSockets, GraphQL, Graphana**
- AI: **Generative AI (Ollama, ChatGPT, Copilot, Claude, Gemini), Offline/Built-In AI**
- Tools & OS: **GitLab, GitHub, Jira, Windows, macOS, Linux, Zed Editor, VSCode & it's Variants**

Projects:

- Project Initiator: Built an automated scaffolding tool (UI + CLI) to accelerate project setup, streamline commits, manage workspaces, and integrate seamlessly with DevOps pipelines.
- Gobilly (POS System): Designed and developed a restaurant POS suite (web + mobile) covering inventory, supply chain, staff, and customer management, with real-time sync.
- Kaushal: Created a mental math & scientific games app, boosting engagement and learning through gamification.
- TechBook: Developed a learning platform with tutorials and quizzes to help users grasp concepts and refresh skills interactively.
- MyQueueBox: Personalized YouTube manager with enhanced sorting, queueing, and ad-free experience.

Achievements:

- Gate Qualified 2019 - **AIR 12686**
- Google Developer Badges – Explorer, Canary Dev, Cloud Native, AI Geek, and more
- Google Chrome **Built-in AI** Challenger – Created an offline-first Typing Master app using built-in Chrome AI APIs (proofreader, summarizer, translator, etc.)
- 5KB Create Certificate – Built a React Native SOS signal app under 5KB of code
- Puzzle Hack Certificate – Developed a **3D** puzzle game with React & Three.js for enhanced UX

Education:

Bachelor of Technology
Aug 2015 – Jun 2019

Maharshi Dayanand University

B.Tech in Computer Science & Engineering with 83%
Data Structures, Design & Analysis of Algorithms, System Design, Software engineering, Database Systems, Operating Systems and Artificial Intelligence
